I am seeking new challenges to broaden my areas of expertise and to use my skills to the best of my ability in a team-oriented workplace. I wish to find a position that will allow me to develop experience using my educational background in combination with previous work experience.

Having 8 Years 3 months of experience in Client Services with technical expertise as a Quality Analyst

- ◆ Develop test plan, prepare effort estimation and schedule for project execution
- ◆ Prepare test cases, review test case result and anchor defects prevention activities and interface with customers for issue resolution
- ◆ Ensure effective test execution by reviewing knowledge management activities and adhere to the organizational guidelines and processes
- ◆ Anchor testing requirements, develop test strategy, track, monitor project plans and prepare solution delivery of projects along with reviewing of test plans, test cases and test scripts
- ◆ Ability to work closely with other QA testers and project team
- ◆ Test design, architecture and scripting knowledge in UIPath
- ◆ Experience in developing test cases and test plans
- ◆ Knowledge of software test life cycle activities and agile methodologies
- ◆ Analytical and client interfacing skills
- ◆ Team coordination

Tata Consultancy Services (Mar 2022- till date):

Job Description: Quality Analyst

- ◆ Currently working as Quality Analyst for Configuration Management Module on BMO (Bank of Montreal) project for the product BMO family office.
- ◆ Managing development sprints by working with UI/UX designers, and development team and delivering projects within estimated timelines.
- ◆ Grooming user stories for each sprint in JIRA.
- ◆ Organize sprint ceremonies – sprint planning, daily scrum call, sprint demos.

Rakuten Mobile, Inc. – Japan (Feb 2020 – Jan 2022):

RCP – Rakuten Cloud Platform (Cloud native - Big data analytics Platform) is a unified OSS platform which is integrated with end to end network elements enabling not only network designing, monitoring and troubleshooting networks but also provide a containerized micro service based architecture on Kubernetes platform enabling both vertical as well as horizontal correlation.

- ◆ Currently working as Quality Analyst for Configuration Management Module on Rakuten project for the product RCP (Rakuten Cloud Platform).
- ◆ Managing development sprints by working with UI/UX designers, and development team and delivering projects within estimated timelines.
- ◆ Grooming user stories for each sprint in JIRA.
- ◆ Organize sprint ceremonies – sprint planning, daily scrum call, sprint demos.
- ◆ Discussion of End-to-End Integration call flows with different vendor
- ◆ Verify the commissioning process and its config file.
- ◆ Parameter discussion with vendors that are required for configuration and parameters of the API that will be exposed by the vendor.
- ◆ **Worked with clients like Rakuten, Nokia Global, Reliance Jio, Telstra, AltioStar and Smartfren**
- ◆ Config file validation in CM based on multi-vendor and multi-technology

Change Management: Smartfren – Indonesia (Jun 2019 to Jan 2020) :

RCP platform provides an end-to-end network life cycle management from planning, managing, and optimizing to upgrading networks. Tilt optimization process enhances the network performance and Automated work order process that generates the work order against each non-compliant parameter to change it to compliant parameter and change the parameter value in the network.

Job Description: Quality Analyst

- ◆ Associated with the Network Analytics & RF Planning team of Smartfren.
- ◆ Responsible for requirement gathering, User Interface technical design for RCP which will provide E2E information of network and their elements.
- ◆ Planning for network optimization using the RCP Application, where users can optimize the parameter value in the network by using the change command.
- ◆ All network related changes can be performed by using the change management module.
- ◆ Worked closely within the team, preparing test plans, and reviewing the test cases.
- ◆ **Associated with the team for Functional and Regression testing and API Testing , Security Testing (using Burp) ,Sanity testing ,GUI Testing etc.**

Configuration Management: Reliance JIO (May 2017 to May 2019) :

Configuration Management provides centralized configuration of multi-vendor, multi-technology, and multi-version networks, in this Network tree drill down allows users to see detailed information from technology level to site level, Define thresholds for parameters against which network is audited and KPI performance impact can be tracked. Administrative interface to manage the parameters, their valid values/ranges, golden configuration and commands to make the changes

Job Description: Quality Analyst

- ◆ Read all the documents and understand what needs to be tested.
- ◆ Involve in **System Testing, Functional Testing and Integration testing, Database testing, Automation Testing (Using Test Project tool).**
- ◆ Develop test cases and prioritize testing activities.
- ◆ Execute all the test case and prepare defects report
- ◆ Carry out regression testing every time when changes are made to the code to fix defects.
- ◆ Data validation using the SQL for database testing
- ◆ Perform UAT testing with the UAT team.

Educational Qualifications

- **ISTQB foundation level certified in Testing.**
- B.E from ITM universe Gwalior in 2015 with aggregate 73.30%.
- 12th Standard from Higher Sec. Education board in 2011 with an aggregate of 65%
- 10th standard from Secondary Education Board in 2008 with an aggregate of 60%

Extra-Curricular Achievements

- Awarded as Technical head in year 2012
- Organize Tech fest in 2012
- Participated in Cricket league in ITM college.

I hereby declare that the information furnished above is true to the best of my knowledge.
