Profile

AI/ML Enthusiast with a background in Quality Assurance, Automation, and Dashboard Development. Experienced in building Power BI dashboards, automating backend workflows, resolving production issues, and collaborating across cross-functional teams. Currently transitioning into AI/ML systems with hands-on experience in data analysis, model validation, and cloud integration. Eager to contribute to scalable ML systems, automated pipelines, and intelligent product features.

Professional Experience

RANDSTAD INDIA (Client: NVIDIA)
Data & QA Analyst | Jan 2023 – Present

- Developed dynamic dashboards using Power BI to visualize KPIs for business stakeholders.
- Automated repetitive workflows using Excel macros, saving 30% of manual effort.
- Collaborated with Engineering teams to validate backend data and support model output quality.
- Assisted in implementing reporting automation and data validation across UAT pipelines.
- Participated in identifying AI/ML integration points to enhance business analytics.

CONNEQT BUSINESS SOLUTIONS
QA Support Engineer | Nov 2022 – Jan 2023

- Handled backend API monitoring and data extraction from SQL/NoSQL databases.
- Built Python scripts for data automation and format correction.
- Worked closely with development teams to resolve integration and deployment issues.

HEXAWARE TECHNOLOGIES
Quality/Data Analyst | May 2022 – Oct 2022

- Conducted data cleaning, formatting, and visualization using Excel and Python.
- Created business intelligence reports and collaborated on predictive analytics tasks.
- Supported data team in curating input datasets for machine learning experiments.

Education

B.E. Electrical Engineering
RVS College of Engineering and Technology | May 2022

Skills & Tools

AI/ML Tools: Python (NumPy, Pandas, Matplotlib), Scikit-learn, TensorFlow (beginner)
Cloud & MLOps: GCP (BigQuery), AWS (basic), Docker (beginner)
Automation & Analytics: Excel Macros, Power BI, SQL, API Monitoring
Testing & QA: Manual Testing, JIRA, Azure DevOps, Postman
Soft Skills: Strong problem-solving, team collaboration, fast learner
Familiar with: CI/CD basics, Agile methodologies, UAT, data validation
