Salesforce 1x Certified Assistant System Engineer
Indore, Madhya Pradesh, India

Summary

With 3 years of IT experience, I've honed my skills while working
on client project in Salesforce, specializing in creating dynamic,
reusable components using Lightning Web Components (LWC) and
basic Apex. I excel in developing robust solutions with Triggers,
Flows, and Process Builder, and have a strong background
in Marketing Cloud, Community Cloud, and Service Cloud,
driving impactful marketing strategies and enhancing customer
engagement.

In addition to my Salesforce expertise, I've worked extensively with
React, developing projects ranging from e-commerce platforms to
interactive dashboards. I focus on designing and building responsive,
engaging user interfaces using Functional React components.

Let's connect to discuss how my Salesforce and React experience
can contribute to your projects and career growth!

Experience

Tata Consultancy Services
Assistant System Engineer
April 2023 - Present (1 year 6 months)
Indore, Madhya Pradesh, India

With 2 years of experience, I specialize in Salesforce development, including
Basic Lightning Web Components (LWC), Triggers, and Flows. My expertise
extends to using Process Builder, and working with Marketing Cloud,
Community Cloud, and Service Cloud. I am proficient in SOQL/SOSL Queries,
Data Modeling and Schema Design, and Integration with External Systems. My
role also involves ensuring Salesforce Security and Sharing Rules, designing
Custom Objects and Page Layouts, and enhancing User Experience (UX).
